Shown with TTI Digiflex 45ei Camera, BetterLight scanning back Super 8K-HS and TTI telescoping lighting with engraved scales.

Designed for the commercial workplace, no effort has been spared to make this workstation exceedingly rigid, perpendicular and parallel. High quality components enhance accuracy and performance. The result is an instrument, which maximizes the capabilities of your digital camera or scanner. It lets you capture clear, sharp images with minimum effort and maximum speed.

With state-of-the-art illumination systems, electronics, optics and precision electro-mechanical drives, the TTI Repro-Graphic Workstation 4060 is a totally integrated image capture system. Simply put, it is the most rugged and precise digital camera/scanner platform commercially offered. It is an investment, which will withstand many years of continuous use.

# PRECISE & EASY IMAGE CAPTURE

The TTI repro-graphic workstation 4060 lets you capture clear, sharp images with minimum effort and maximum speed.

## BASE FRAME

Heavy gauge steel tubing, welded to form an exceptional rigid base. This structural base is designed to minimize vibration from the ground surface. Adjustable feet provide the initial leveling of the workstation.

## WORK TABLE

1-5/8" thick, fully covered with heavy duty laminate, provides a flat, durable surface for many years of care free use.

## COLUMN

A massive aluminum extrusion provides an extremely rigid column which cannot twist or sag. A built-in unique leveling system provides perpendicular adjustment to the work table. The column reference scale is printed in crisp, easy to read numbers in inches and centimeters for a quick visual check while positioning the camera.

## ELEVATION CARRIAGE

The moving carriage is driven by a heavy-duty motor and lead

screw, the preferred method for precision travel. This provides smooth camera movement and automatic lock at any position.

## CAMERA MOUNT

TTI's exclusive mounting system is designed to provide exceptional support for any camera or scanner, maintaining optical center throughout the elevation range. A vital detail so often overlooked by others. TTI also provides camera mounts for most digital cameras, scanning backs, film cameras, medium and large formats.

## LENSES & LENS MOUNTS

TTI carefully selects the best Apo-Chromatic digital lenses to suit the application. Lenses mount on TTI quick change rotating lens boards.

## TTI DIGIFLEX 45EI

Primarily designed to be used in conjunction with digital scanning camera backs for digital capture of flat art media. The bright ground glass helps you

TTI lighting is engineered for extraordinarily glare-free and even illumination.

size and focus with ease. A viewing hood blocks most of the ambient light, providing you with a bright image on the ground glass. An optional graflock interface plate is available for mounting medium format digital backs.

## DIGITAL ELEVATION COUNTER

This digital readout monitors the camera elevation. It is precise

and repeatable, allowing exact replications of previous settings, a valuable tool in a production environment.

## REFLECTIVE LIGHT SOURCE

With most of the heat exiting from the rear reflector of the lamps, the TTI reflective lighting system provides brightness, evenness of illumination and a cool work surface. Reflective lighting available as stand alone.

## SPECIFICATIONS

### Repro-Graphic Workstation 4060

Column height:	72"
Power elevation:	Variable speed hand held remote control.
Digital counter:	For exact size repositioning
Camera mount:	Positive click-stop center; +/-90; rotation
Work surface height:	14"
Work surface size:	40"x60" (optional with built-in vacuum).
Reflective lighting:	2000 watts, quartz halogen 3200K, telescoping system.
Overall dimensions:	120"W x 47"D x 90"H.
Power requirement:	120VAC, 50/60Hz., 20A. (with Vacuum (2) 20A. circuits req'd.).
Shipping weight:	410 lbs. (1) crate and (1) box

## OPTIONAL ACCESSORIES

Camera mount:	35mm, medium format and large format.
Cameras:	TTI Digiflex 45ei and TTI Digiflex 67ei and other cameras.
Graflock interface plate:	For medium format digital camera backs.
Lens mounts:	Extension/recess or additional flat lens boards.
Lenses:	Highest quality Apo-Chromatic digital lenses available from TTI.
IR Filter:	Threads in front of lens barrel (scanning backs).
Reflective lighting:	TTI stand alone: 1200W-2000W 3200K. TTI-LED System 2100-64. Available, contact TTI for details.
Strobe Lighting:	For all TTI reflective lighting.
Polarize filter holders:	TTI stand alone or built-in 250W quartz halogen 3200K 10" x 10"
Transmissive lighting:	Hinged glass holder with 2 registered pins and anti-Newton ring glass.
Media Holding System:	Included: 8" x 10", 4" x 5", 6x6cm and 35mm mounted slide. Increases light output for 4"x5" format and smaller.
Registered masks:	Table top or built-in copy board (see TTI Vacuum Easels line).
Light amplifier:	Help in positioning media when used in conjunction with vacuum easel
Vacuum easels:	For larger sizes than 40" x 60" and for eliminating vibration
Magnetic bars:	All TTI Cameras also mount on tripod for 3D controlled captures.
Wall mount/brace:	Heavy duty caster-levelers for mobility of workstation when needed.
Tripod mount adaptor:	
Caster-Levelers:
